

STATE LOCAL AND TRIBAL

A realistic illustration of a Canada goose standing and facing left. The goose has a black head and neck with a white patch on its cheek, a long black neck, and a body with dark brown and black feathers. It is casting a long, dark shadow on the ground to its left. The background is a plain, light beige color.

1983 North Dakota small game and habitat stamp, booklet pane of five
Two recorded panes

A stamp could also become a rarity if a state agency printed its stamps in more than one format. In the 1980s, North Dakota became the first state to print two versions of its duck stamps - sheets of stamps for collectors and booklets of stamps for hunters. It took most collectors several years to discover this, and the early booklet-type stamps (those issued to hunters) are now very difficult to find in unused condition.
